

ERN RARE-LIVER

ERN RARE-LIVER is a Europe-wide network for centres of excellence in the clinical management of rare liver disease in adults and in children. Types of diseases covered by the network currently include Autoimmune liver disease; Metabolic, Biliary artresia and related disease; structural liver disease and rare liver disease in pregnancy.

R-LIVER

R-Liver is the prospective registry of ERN RARE-LIVER, which currently focuses on autoimmune liver diseases AIH, PBC, PSC and polycystic liver disease. Other registries, i.e. for vascular liver diseases, will become ERN RARE-LIVER registries in the future, either as separate registries or incorporated into R-LIVER.
