CPMS

Clinical Patient Management System

Consulting the best European
experts for your patients with rare
liver diseases

Marcial Sebode, Juliane Gaenge, Gustav Buescher,
Ida Schregel (University Medical Centre Hamburg-Eppendorf)
Renée Duijzer (Radboudumc, Nijmegen)

Share. Care. Cure.

Share. Care. Cure.

In the European Reference Networks (ERNs), doctors and researchers share expertise in the fields of rare or low-prevalence and complex diseases.

What is CPMS?

A web-based application to consult European experts for diagnostic challenges and difficult-to-treat patients with complex and rare liver diseases.

How?

Healthcare professionals can share and discuss difficult cases. Therefore, clinical data, histological slides and imaging studies can be uploaded in a protected digital environment. The recommendation of a panel is made available as an official ERN digital document.

First step?

Scan the QR-code or go to the following website:
